Building & Earth Sciences recently finished materials testing and Special Inspections services for 1000 Redstone Gateway, the first office building in the Redstone Gateway development. The \$12,900,000 structural steel and precast 5 story 121,000 square foot Class A office building is the first phase of a \$1 Billion office park development which, when completed, will include 4.4 million square feet of space on more than 468 acres. Building & Earth was engaged from the inception of the project to provide geotechnical engineering services through the planning stage and continues to provide geotechnical consulting, full service materials testing and Special Inspections services to the COPT-led team on current phases of construction.
